AUDIT

Usability

16 issues · 0 critical · 2 major · 13 minor · 1 suggestion

The website presents a high-quality, modern aesthetic with a clear information architecture and effective use of imagery. While the overall user experience is strong, there are several layout imbalances and consistency issues in call-to-action styling that could be refined to improve visual flow and reduce cognitive load.

Consistency 3

1. Many button styles

Major

7 distinct button styles (aim 5 or fewer)

TRY

Consolidate buttons into 2–3 variants (primary, secondary, ghost) with shared padding, radius and font.

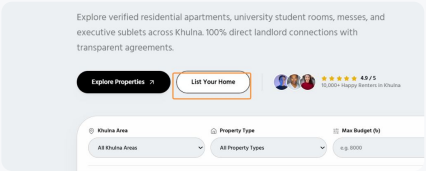

2. The 'List Your Home' call-to-action is styled inconsistently across the page: as a secondary white button in the hero, a primary black button in the request section ('List Free'), and a simple text link in the footer. This inconsistency makes a key conversion path harder to recognize.

Major

> *“List Your Home”*

TRY

Standardize the 'List Your Home' action as a consistent button style (e.g., always the secondary white pill button) throughout the site.

Captured on page · Major

3. No consistent type scale

Minor

13 distinct font sizes (aim 10 or fewer)

TRY

Define a fixed type scale (e.g. 12/14/16/20/24/32px) and map every text style onto it.

Found 13 distinct font sizes (a tidy interface usually stays under 10). Too many suggests no shared system and a less cohesive feel.

Typography 6

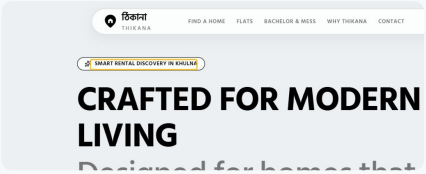

4. Long all-caps text

Minor

32 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

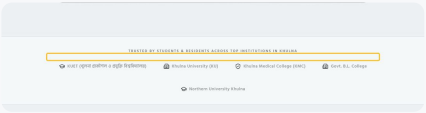

5. Long all-caps text

Minor

65 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

6. Body text is very small

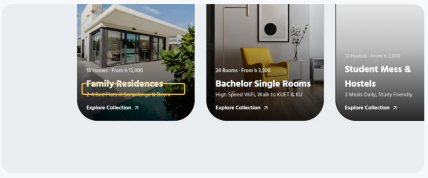

Minor

Font size 11px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 11px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

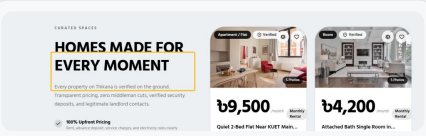

7. Long all-caps text

Minor

27 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

8. Body text is very small

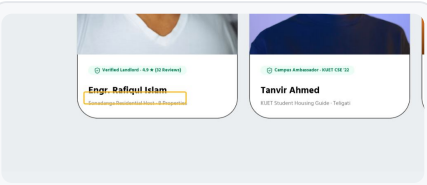

Minor

Font size 10px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 10px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

9. Body text is very small

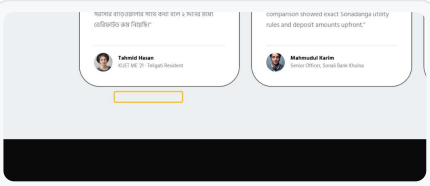

Minor

Font size 11px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 11px. Body copy below ~12px is hard to read, especially on mobile.

Layout 3

10. Heading level skipped

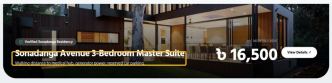

Minor

H1 to H3

TRY

Use the next heading level down (or style the correct level with CSS) instead of skipping.

This is an H3 but the previous heading was H1. Skipping levels breaks the document outline.

Captured on page · low

11. Heading level skipped

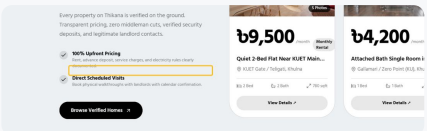

Minor

H2 to H4

TRY

Use the next heading level down (or style the correct level with CSS) instead of skipping.

This is an H4 but the previous heading was H2. Skipping levels breaks the document outline.

Captured on page · low

12. Heading level skipped

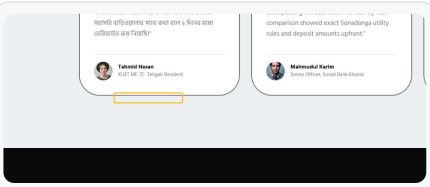

Minor

H2 to H4

TRY

Use the next heading level down (or style the correct level with CSS) instead of skipping.

This is an H4 but the previous heading was H2. Skipping levels breaks the document outline.

Spacing & alignment 1

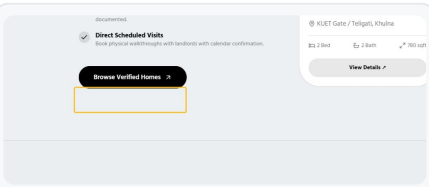

13. In the 'Homes Made for Every Moment' section, the left-hand text and CTA block is significantly shorter than the adjacent property cards, resulting in a large, awkward vertical void below the primary button.

Minor

> *“Browse Verified Homes”*

TRY

Consider vertically centering the text block against the cards or adding additional supporting content (like a brief 'how it works' list) to fill the vertical space.

Captured on page · Minor

Hierarchy 2

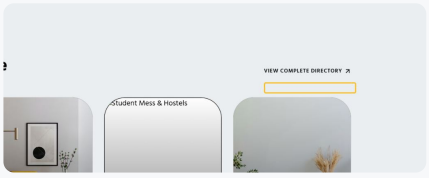

14. The 'View Complete Directory' link is very small and placed at the far right edge of the viewport, making it visually detached from the 'Browse by Living Style' heading it relates to.

Minor

> *“View Complete Directory”*

TRY

Move the link closer to the heading or increase its visual weight (e.g., using a button style) to ensure users notice the option to see more categories.

Captured on page · Minor

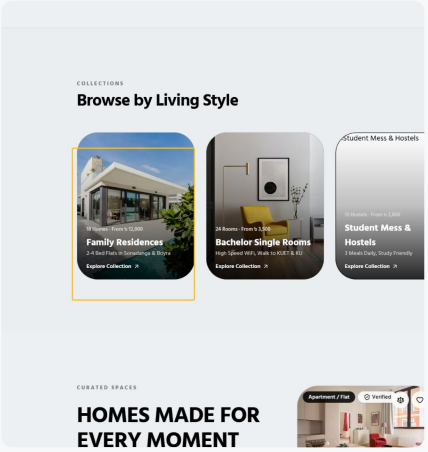

15. In the 'Living Style' cards, the property count and pricing metadata are placed at the very top while the category title is at the bottom. This split forces the eye to scan across the entire image to connect the data with the category name.

Suggestion

> *“18 Homes · From ৳12,000Family Residenc…”*

TRY

Group the category title and metadata together at the bottom of the card to create a single, cohesive information block.

Captured on page · Suggestion

Grouping 1

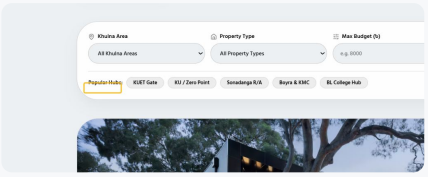

16. The 'Popular Hubs' quick-filter buttons are separated from the main search bar by excessive whitespace and are placed below the entire row, weakening their perceived relationship as shortcuts for the 'Khulna Area' dropdown.

Minor

> *“Popular Hubs”*

TRY

Reduce the vertical margin between the search inputs and the quick-filter buttons to more tightly group them as part of the search interface.
