AUDIT

Usability

8 issues · 0 critical · 1 major · 6 minor · 1 suggestion

The page presents a clean, professional property listing interface with a well-organized grid and comprehensive filtering options. While the overall structure is sound, there are several minor layout inconsistencies and hierarchy issues, particularly regarding the placement of the search bar and the overwhelming scale of the footer contact information.

Consistency 2

1. Many button styles

Major

6 distinct button styles (aim 5 or fewer)

TRY

Consolidate buttons into 2–3 variants (primary, secondary, ghost) with shared padding, radius and font.

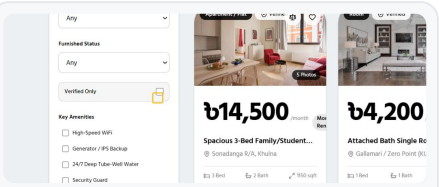

2. The 'Verified Only' checkbox is aligned to the right of its label, whereas the 'Key Amenities' checkboxes are aligned to the left. This inconsistency disrupts the vertical scanning pattern for users interacting with the filter sidebar.

Minor

> “”

TRY

Align the 'Verified Only' checkbox to the left of its label to maintain consistency with the 'Key Amenities' section and standard form patterns.

Typography 2

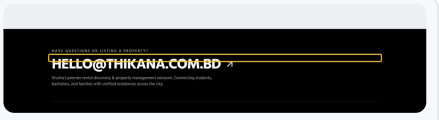

3. Long all-caps text

Minor

37 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

4. Long all-caps text

Minor

20 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

Hierarchy 2

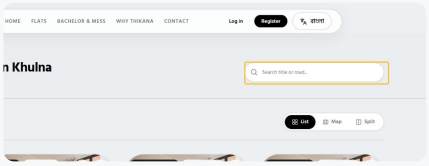

5. The search bar is positioned far to the right, disconnected from the main 'Explore' heading and the primary content area. This placement makes it less discoverable as a primary tool for users looking for specific properties.

Minor

> “”

TRY

Move the search bar to a more central location or place it directly beneath the main heading to better align with the user's primary intent.

Captured on page · Minor

6. The email address in the footer is excessively large, dominating the entire bottom section of the page. This creates an unbalanced visual hierarchy where a single contact link outweighs the actual navigation and utility links in the footer.

Minor

> *“HELLO@THIKANA.COM.BD”*

TRY

Reduce the font size of the email CTA to better integrate with the footer's overall scale while maintaining its importance as a contact method.

Spacing & alignment 1

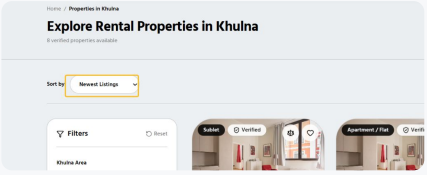

7. The 'Sort by' dropdown and the view toggle buttons (List, Map, Split) are placed on the same horizontal line but separated by a massive gap of dead whitespace. This disconnects related controls that govern the presentation of the results.

Minor

> *“Newest ListingsRent: Low to HighRent: H…”*

TRY

Group the 'Sort by' and view toggle controls closer together, perhaps by moving the view toggles to the left or centering the entire control bar.

Affordance 1

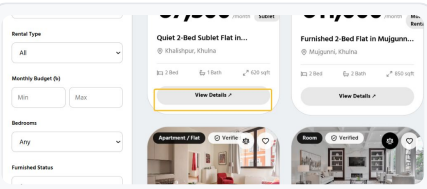

8. The 'View Details' buttons on the property cards use a light grey background that can be easily mistaken for a disabled state. This reduces the visual prominence of the primary action for each listing.

Suggestion

> *“View Details ”*

TRY

Use a higher-contrast background color or a more distinct primary brand color for the 'View Details' buttons to clearly signal their interactivity.
