AUDIT

Usability

20 issues · 0 critical · 3 major · 16 minor · 1 suggestion

The property listing page features a clean, modern layout with a clear visual hierarchy and effective information grouping. Information is logically organized into cards, making the dense property data easy to scan, and the primary call-to-action is well-emphasized in the sidebar. Minor improvements could be made to the vertical spacing of some sections and the placement of secondary utility actions to better align with standard user expectations.

Consistency 6

1. Many button styles

Major

8 distinct button styles (aim 5 or fewer)

TRY

Consolidate buttons into 2–3 variants (primary, secondary, ghost) with shared padding, radius and font.

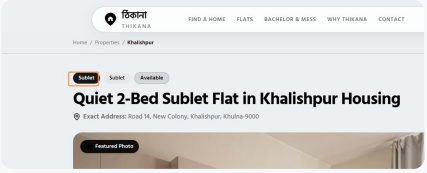

2. The "Sublet" label is duplicated in two adjacent badges using different visual styles (solid black vs. light grey). This redundancy and inconsistent styling make the categorization system confusing and difficult to parse.

Major

> *“Sublet”*

TRY

Remove the duplicate badge and establish a consistent visual language for categories versus status tags.

Captured on page · Major

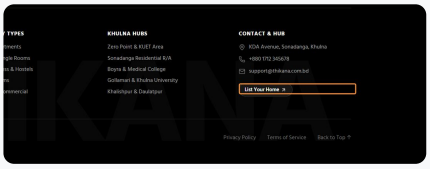

3. The phone number and support email address in the "Contact & Hub" column are static text rather than interactive links. Users expect these elements to be clickable (tel: and mailto:) to quick-ly initiate contact, especially on mobile devices.

Major

> *“support@thikana.com.bd”*

TRY

Wrap the phone number and email address in appropriate anchor tags to enable click-to-call and click-to-email functionality.

Captured on page · Major

4. No consistent type scale

Minor

11 distinct font sizes (aim 10 or fewer)

TRY

Define a fixed type scale (e.g. 12/14/16/20/24/32px) and map every text style onto it.

Found 11 distinct font sizes (a tidy interface usually stays under 10). Too many suggests no shared system and a less cohesive feel.

5. Inconsistent corner radii

Minor

7 distinct border radii (aim 6 or fewer)

TRY

Pick a small radius scale (e.g. 4/8/16px) and apply it consistently across components.

Found 7 distinct border radii (a tidy interface usually stays under 6). Too many suggests no shared system and a less cohesive feel.

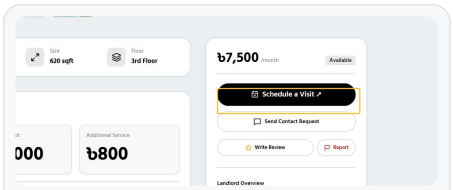

6. The vertical stack of buttons uses three different heights (48px, 44px, and 36px), which creates an inconsistent visual rhythm and makes the interface feel unpolished.

Minor

> *“Schedule a Visit ”*

TRY

Standardize the height of the primary and secondary buttons to create a more cohesive action group.

Typography 3

7. Body text is very small

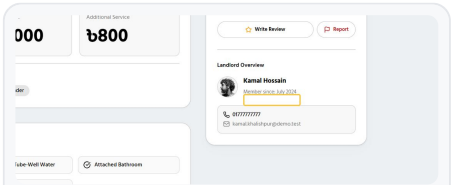

Minor

Font size 11px (min ~12px)

TRY

Increase this text to at least 12px (16px for body copy) so it stays readable on small screens.

Text here is 11px. Body copy below ~12px is hard to read, especially on mobile.

Captured on page · low

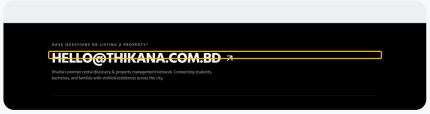

8. Long all-caps text

Minor

37 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

9. Long all-caps text

Minor

20 chars in all-caps

TRY

Use sentence case for long text and reserve all-caps for short labels or badges.

Captured on page · low

Spacing & alignment 7

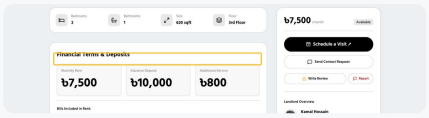

10. The individual cards for rent and deposit amounts contain excessive vertical whitespace, which pushes subsequent content further down the page and creates an uneven visual density compared to the more compact "Bills Included" section below.

Minor

> *“Financial Terms & Deposits”*

TRY

Reduce the vertical padding within these cards to create a more balanced and cohesive section.

Captured on page · Minor

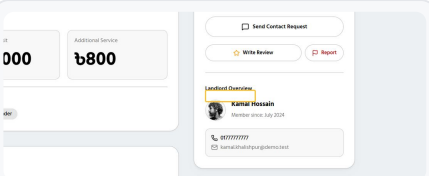

11. The horizontal divider is positioned too close to the buttons above it, lacking sufficient breathing room compared to the generous spacing used elsewhere in the card.

Minor

> *“Landlord Overview”*

TRY

Increase the vertical margin above the horizontal rule to balance the white-space between the action buttons and the landlord section.

Captured on page · Minor

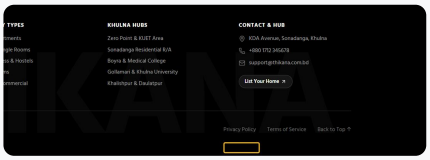

12. The bottom utility row features inconsistent horizontal spacing between the "Privacy Policy," "Terms of Service," and "Back to Top" links, creating a fragmented and unpolished visual finish to the page.

Minor

> *“Privacy Policy”*

TRY

Standardize the horizontal gaps between the links in the bottom-right cluster to ensure a consistent and intentional layout.

Captured on page · Minor

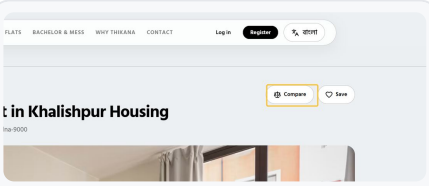

13. The "Compare" and "Save" utility buttons are vertically aligned with the top row of badges rather than the primary H1 title. This creates a visual disconnect between the main subject of the page and the primary actions.

Minor

> *“Compare”*

TRY

Re-align the utility buttons to center vertically with the H1 title or the entire header block to create a more cohesive grouping.

Captured on page · Minor

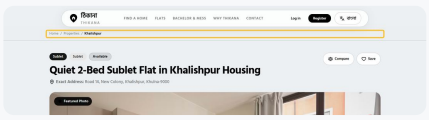

14. The breadcrumb navigation is positioned too close to the top edge of the container, creating a cramped appearance that lacks sufficient breathing room compared to the larger gaps below it.

Minor

> *“Breadcrumb”*

TRY

Increase the top padding or margin for the breadcrumb element to improve visual balance.

Captured on page · Minor

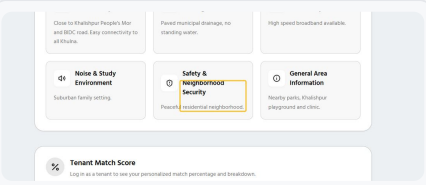

15. The heading 'Safety & Neighborhood Security' wraps to three lines, which pushes the description text downward and breaks the horizontal alignment (baseline) with adjacent cards in the same row. This also leaves the card with noticeably less bottom padding than its neighbors, making it feel vertically cramped.

Minor

> *“Safety & Neighborhood Security”*

TRY

Implement a consistent minimum height for the heading area within the cards to ensure that all description text starts at the same vertical position across the row.

Captured on page · Minor

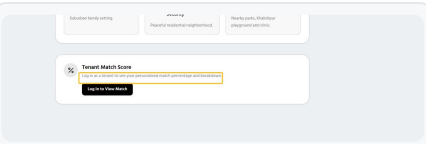

16. The "Tenant Match Score" section occupies a large container with significant empty space around a single heading and button, resulting in a low information-to-space ratio that increases the overall page length unnecessarily.

Suggestion

> *“Tenant Match Score”*

TRY

Condense this section vertically or integrate the call-to-action into a more compact horizontal banner.

Captured on page · Suggestion

Hierarchy 4

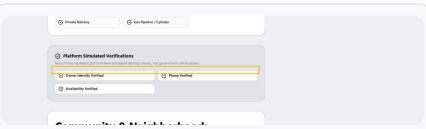

17. The disclaimer text regarding simulated verifications is visually diminished due to its small size and low contrast, making this important context regarding the "verified" status easy for users to overlook.

Minor

> *“Note: These represent platform-level”*

TRY

Increase the font size or contrast of the disclaimer to ensure it is legible and provides necessary transparency.

Captured on page · Minor

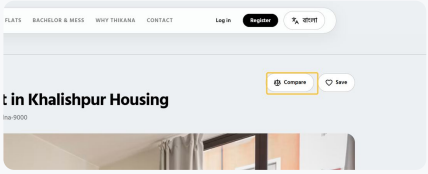

18. The "Compare" and "Save" buttons are positioned vertically above the main property title, which disrupts the natural top-down reading flow where the subject (the property name) should be established before actions are presented.

Minor

> *“Compare”*

TRY

Align these utility buttons horizontally with the property title or move them to a dedicated action bar below the title.

Captured on page · Minor

19. The contact banner is excessively large and left-aligned, creating a top-heavy visual imbalance that leaves a large void in the top-right of the footer and makes the functional sitemap links below it feel like secondary "fine print."

Minor

> *“HELLO@THIKANA.COM.BD”*

TRY

Reduce the scale of the email banner and consider centering it or balancing it with other high-level information to create a more harmonious footer composition.

Captured on page · Minor

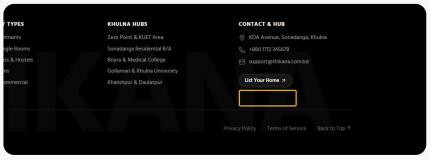

20. The "List Your Home" CTA uses a low-prominence ghost button style (outline only) and is placed at the bottom of a contact list. As a primary conversion path for the platform's supply side, it lacks the visual weight needed to stand out against the dominant banner above.

Minor

> *“List Your Home”*

TRY

Use a solid background color for this button to give it more visual weight and distinguish it as a primary action for landlords.
